

## 3D METALFORGE ACCELERATES EXPANSION INTO AUSTRALIAN MARKET WITH HIRING OF HIGHLY EXPERIENCED BUSINESS DEVELOPMENT EXECUTIVE

### Highlights:

- *Highly experienced industrial sales and marketing professional, David Green, has been hired to develop strategic opportunities in the Australian and New Zealand energy, resources, industrial and defence sectors.*
- *Mr Green will drive the growth of 3D Metalforge's intelligent additive manufacturing in Australia and New Zealand to help companies make their supply chains more sustainable and robust, and to produce parts more cost effectively, faster and better than traditional manufacturing.*
- *Mr Green has three decades of global business development and sales experience and an extensive network of contacts across the manufacturing, mining, oil and gas, and shipbuilding industries in Australia, New Zealand and South East Asia.*

**8<sup>th</sup> JUNE 2021:** 3D Metalforge (ASX: 3MF) ("3D Metalforge" or the "Company"), a revenue generating Additive Manufacturing company, is pleased to announce that it has added to its team, a highly experienced industrial sales and marketing professional, David Green as its Australian based Business Development Director.

Mr Green will work directly for the Company's Managing Director to identify high potential key accounts and lead subsequent client development work to secure sales of 3D Metalforge's range of services in the Australian and New Zealand market.

Many of 3D Metalforge's existing global customers have offices and manufacturing facilities in Australia. Mr Green will work closely with this client base to promote opportunities primarily in the energy, resources, industrial and defence sectors.

3D Metalforge's Managing Director Matthew Waterhouse said: "We are thrilled to have David join the team and to create a strong presence in Australia and New Zealand. We believe that there is significant potential for 3D Metalforge to become a foundation AM company in this market and an opportunity to partner with organisations to build more sustainable and robust supply chains for their part production."

3D Metalforge's intelligent Additive Manufacturing approach will support a number of sectors' move towards greener manufacturing and production technology as well as supporting the growth of Australian advanced manufacturing sector as part of the transformation to higher-tech capabilities.

- ENDS -

This announcement has been approved for release by the Managing Director of 3D Metalforge Limited.
